Pre-medicate with other: _____

Orders: Obtain weight each visit. Instruct patient/caregiver on medications and signs/symptoms of adverse reaction. Assess patient for response to therapy. Utilize existing central line for administration or initiate a peripheral IV with each infusion as needed. Sodium Chloride 0.9% flush 3-10 ml before, after, and as needed during the infusion. Follow infusion with Heparin 100 units/ml 1 – 5 ml per line type or to peripheral IV as required for multiple day treatments. Pump, tubing, 0.22-micron filter, and supplies needed to complete prescribed therapy. Pharmacist to perform clinical drug monitoring. **Extended one (1) hour post infusion monitoring after each treatment as clinically indicated. If adverse drug reaction occurs, utilize the ADVERSE DRUG REACTION GUIDELINES.**

4. Drug: Albumin 25%

____ **Supporting clinical MD notes to include any past tried and/or failed therapies, intolerance, outcomes or contraindications to conventional therapy. Include any lab results and/or tests to support diagnosis.**

____ Other as requested: _____

**** Warnings/Precautions:** • ALBUMIN (HUMAN) 25% SOLUTION, USP should not be given to patients at special risk of developing circulatory overload (i.e., those with a history of congestive cardiac failure, renal insufficiency or stabilized chronic anemia). **WARNINGS AND PRECAUTIONS** General ALBUMIN (HUMAN) 25% SOLUTION, USP is made from human plasma. Albumin is a derivative of human blood. Based on effective donor screening and product manufacturing processes, it carries an extremely remote risk for transmission of viral diseases. The physician should discuss the risks and benefits of this product with the patient, before prescribing or administering to the patient. **Adverse Drug Reaction Overview:** Adverse reactions to albumin are rare. Such reactions may be allergic in nature or due to high plasma protein levels from excessive albumin administration. Allergic manifestations include urticaria, chills, fever, and changes in respiration, pulse and blood pressure. The possibility of an anaphylactic reaction occurring in association with albumin is considered extremely rare. In the case of an anaphylactic reaction, discontinue infusion and treat appropriately. See full prescribing information

Palmetto Infusion Services will complete insurance verification and submit all required clinical documentation to the patient’s insurance company for eligibility. Our office will notify you if any further information is required. We will review financial responsibility with the patient and refer them to any available Co-pay assistance as required. Thank you for the referral.

Please fax all information to 1-866-872-8920 or call 1-800-809-1265 for assistance.
