# Guidelines for Prescribing Cimzia® (certolizumab pegol) for Gastroenterology

**(Required documentation with all initial referrals)**

**Patient Name:** _____ **Referral Date:** _____

☐ Include signed and completed **Plan of Treatment**.

☐ Include patient demographic information and insurance information. (Copy of insurance cards if available)

☐ **Supporting clinical MD notes to include any past tried and/or failed therapies, intolerance, outcomes or contraindications to conventional therapy. Include any lab results and/or tests to support diagnosis.**

- CIMZIA® is indicated for reducing signs and symptoms of Crohn's disease and maintaining clinical response in adult patients with moderately to severely active disease who have had an inadequate response to conventional therapy. The recommended initial adult dose of CIMZIA® is 400 mg initially, and at weeks 2 and 4. In patients who obtain a clinical response, the recommended maintenance regimen is 400 mg every four weeks.

☐ If patient is switching biological therapies, then MD must specify wash-out period prior to starting CIMZIA® as specified of_____weeks. Last known biological therapy:_____and last date received:_____. (Include copy of last CIMZIA® injection record if available and currently on therapy)

☐ Other as requested: _____

_____

_____

**Pre-Screening:**

☐ **Required TB screening results: PPD or QuantiFERON Gold Test.**
(* If screening results are positive or indeterminate, then a negative CXR result is required.)

☐ **Required Hepatitis screening to include: Hepatitis B Surface Antigen results.**

** **Warnings/Precautions:** Cimzia® (certolizumab pegol) may increase the **risk of infections** and reactivation of latent infections. **Heart failure**: worsening or new onset may occur. **Hepatitis B virus reactivation**: test for HBV infection before starting CIMZIA®. Monitor HBV carriers during and several months after therapy. If reactivation occurs, stop CIMZIA® and begin anti-viral therapy. **Demyelinating disease**: exacerbation or new onset, may occur. **Cytopenias, pancytopenia**: advise patients to seek immediate medical attention if symptoms develop, and consider stopping CIMZIA®. **Lupus-like syndrome**: stop CIMZIA® if syndrome develops. Evaluation of immunizations should be completed prior to and **live vaccines** should not be given before or concurrently with CIMZIA® See full prescribing information.

Checklist for referrals to AccuRX Infusion Center:

Fax referral to 1-866-990-3192

- Patient demographics – address, phone number, SS#, etc.
- Insurance Information – copy of the card(s) if possible
- Plan of Treatment/Orders
- Most recent physician office notes to include tried and failed therapies – all insurance companies that require a pre-authorization require the note. This includes Medicare/Medicaid HMOs
- Any lab results or other diagnostic procedures to support the diagnosis

AccuRx Infusion Center will complete insurance verification and submit all required clinical documentation to the patient's insurance company for eligibility. Our office will notify you if any further information is required. We will review financial responsibility with the patient and refer them to any available Co-pay assistance as required. Thank you for the referral.
